

Carbon Reduction Plan

About RCL

Founded in 1997, Rolfe Contracting Limited (RCL) began as a mechanical and electrical installation contractor providing cat A fit outs and refurbishment services. Driven by organic growth and increased client demand for post installation maintenance we established an FM arm of the business in 2004. As an SME we employ circa 50 people and work with a wide range of public and private sector customers and partners, we invest in new technologies and utilise them imaginatively to improve business and environmental efficacy and ensure client portfolios work more efficiently.

Commitment to achieving Net Zero

Over the past two decades the effects of climate change have accelerated and as a conscientious business RCL endorse and proactively support the ambitious carbon reduction targets set out within the sixth Carbon Budget. We will work collaboratively with our supply chain, clients and third party organisations in the development of solutions to reduce our greenhouse gas emissions.

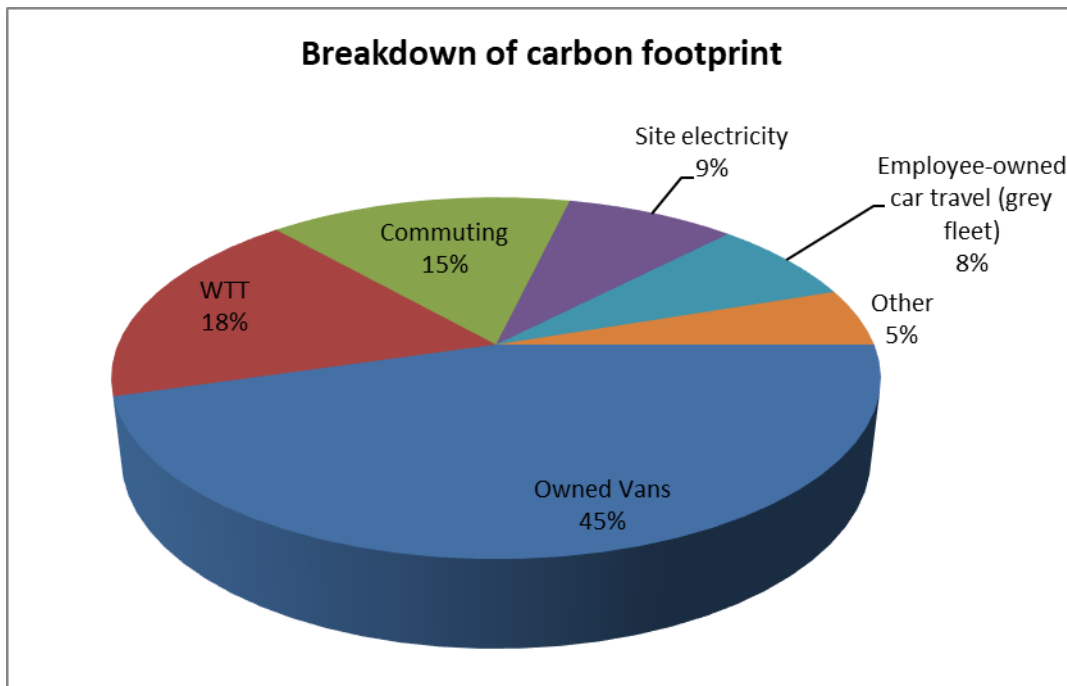

RCL is committed to achieving Net Zero emission by 2040

Baseline Emissions Footprint

Baseline Year: 2021	
Carbon Footprint has assessed the GHG emissions from 1 st June 2020 to 31 st May 2021 resulting from the energy consumption at Rolfe Contracting’s office and its business transport activities.	
This Plan will set the base year for all further reporting emissions to be compared against. RCL has accounted for all quantified GHG emissions and/or removals from facilities over which it has financial control.	
The figures and information used in calculations have been provided as accurate to the best of our knowledge and as far as is practicable the figures are representative of our operation	
Emissions	Total (tCO2e)
Scope 1	129.43
Scope 2	21.98
Scope 3	Well To Tank 49.42 Commuting 41.83 Employee-owned car travel (grey fleet) 20.75 Waste 7.50 Electricity transmission & distribution 1.49 Rail travel 1.24 Home-workers 0.77 Total Scope 3 : 122.99
Total Emissions	274.4

Current Emissions Reporting

Reporting Year: 2022	
Emissions	Total (CO ₂ e).
Scope 1	129.43
Scope 2	21.98
Scope 3	Well To Tank 49.42 Commuting 41.83 Employee-owned car travel (grey fleet) 20.75 Waste 7.50 Electricity transmission & distribution 1.49 Rail travel 1.24 Home-workers 0.77 Total Scope 3 : 122.99
Total Emissions	274.4

Emission Reduction Targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets. Going forward we intend to implement further measures such as:

<i>Emission Reduction Opportunity</i>	<i>Action</i>	<i>Target Date</i>
<i>100% Renewable Electricity</i>	<i>Switch to a renewable energy tariff to reduce emissions associated with electricity use</i>	<i>2025</i>
<i>Reducing carbon emission by 50 %</i>	<i>Reduce market based emissions</i>	<i>2030</i>
<i>100 % company cars and light vehicles electric or other zero carbon technology</i>	<i>Transitioning to electric vehicles (EV) and installing charging points on-site</i>	<i>2035</i>

Declaration and Sign Off

This Carbon Reduction Plan Has been completed in accordance with PPN 06/21 and associated guidance and reporting for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol.

This Carbon Reduction Plan has been reviewed and signed off by the Operations Director, Ray Hughes, on behalf of the Board of Directors
